Lubetech is an environmental company, a leading manufacturer with a Global reach. Although our business is about protecting the environment, we remain very much a people-based organisation who care about protecting the environment for future generations. As world leaders in spill product development we design with the head, but we innovate from the heart. Customers see, touch and benefit from those technical advances every day.

Why Lubetech?

Here at Lubetech, we are passionate about making a difference in every area of spill control. An international team of dedicated professionals with decades of experience in all areas of spill control and spill control management, since 1996 we have led the way in the development and distribution of spill control products, and today our brand is globally recognised and a critical resource for more than 20,000 companies across 5 continents. We lead in not just one area, but four:

Technology

At Lubetech we know things are not always easy and that `safe` things are not always so. That is why we utilise technology to maximise performance of the products you use, making your life easier and genuinely safer. Our R&D team works hard to ensure the latest technology is in place. We use it everywhere: Technology in the fibres that make up your absorbent pads, keeping each fibre

longer and stronger: Technology in your absorbent socks, retaining more fluid: Technology in your spill pallets, so they last longer and carry more: Technology in your spill response kits, making them lighter and more absorbent... While our competitors offer what they call Second Generation products Lubetech is at Third Generation, and already planning for tomorrow.

Sustainability

At Lubetech we strive to supply you with the very best spill control & environmental protection products available. With this comes a responsibility to help protect the wider environment and future generations. Wherever raw materials are sourced, wherever our products are manufactured, we pursue sustainability.

Increasingly developing products from renewable or recycled resources, we constantly reassess our environmental processes and ways to reduce our carbon footprint.

Innovation

Innovation: One word, but it's what we're all about. Our philosophy is to think `outside the box` and come up with new ideas - Ideas to help you; new improved products and new ways to do things, all making it advantageous to work with us. Our objective is to make it easier for you to protect the environment, and that

is reflected in everything we do. Our products have all had hours of effort invested by our R&D team paying attention to every detail, ensuring the product is the most versatile, strongest and most efficiently designed currently available in the UK.

Support

Lubetech are committed to providing a World Class level of technical support and backup for all customers. If you are unable to find

required information in this catalogue or on our comprehensive website just ask and we will do our very best to help.

It's not only spill control equipment that Lubetech offer. As part of our dedication to our global customers and ensuring that the package we offer is complete, The experts from the Lubetech Skill Centre carry out site surveys and spill control training, making your spill response systems more efficient and staff more effective. We have a specialist team, and the Helpdesk can be contacted on +44 2380 240 480.

We also supply Basic 'Skills for Spills' courses independently.

Surveys

Increasingly, legislation surrounds spill control in business and it's vital to have a contingency plan or active spill management system in place. We offer a staged advisory service, starting with site audits, to verbally highlight non-compliant areas and make suggestions for the professional equipping of the site.

As a next step, a Lubetech Skill Centre Site Survey will assist you both with Pollution Prevention Guidelines (PPG) and achieving ISO 14001.

Our Surveys are flexible too! Our responsibility in this

area extends to recommendation of only those items that your site needs. Each Survey is 100% site-specific, selecting products from the Lubetech range that are practical, sensible and cost-effective.

Report findings will be submitted in written format, justified by the relevant legislation surrounding our findings, then the actual area requirement(s). Surveys have become important where your site is considering an Environmental Management System (EMS), required for insurance purposes, or following an incident when lessons need to be learned for the future.

Training

The Environment – it's something we hear a lot about these days. But money is important too.

It is important to remember that for the environment to stay how it is, we have to look after it. All staff at Lubetech know it is the responsibility of company and individual alike to protect both their working and the wider environment. But it's also sound business sense when the costs of NOT complying can be enormous. Spills cost you dear - in financial terms and with

corporate reputation. For spill response to be effective, all key personnel need training.

The team at The Lubetech Skill Centre recognise the need for training to be presented at both the right level and in the most effective manner. From this, we have come up with three different levels of spill response training – and any one can be used as a foundation to ensure compliance with your own site-specific requirements.

Understanding The Absorbent Types

Absorbents are not intended to baffle. Lubetech believes strongly in keeping things simple, so we divide our products into just three basic categories.

Maintenance

- Generally dark-grey or black maintenance absorbents derived from meltblown polypropylene and other resources, suitable for all fluid spills, including water-based fluids, oils and oil-based fluids or non-aggressive chemicals
- Ideal for use in industrial situations where many different kinds of liquids are present at the same time
- Maintenance absorbents are available as pads, rolls, socks, pillows and in a wide range of spill kits to suit all requirements
- Larger spill kits available with refill kits to reduce costs

Oil-Only

- Always white in colour for easy recognition, and dedicated to resolving oil and hydrocarbon spills
- Manufactured from materials built to handle the toughest environments
- Hydrophobic technology - oil-only absorbents do not absorb water making them ideal for the outdoor environment when water and oils must be separated
- Buoyant in water – even when fully oil-saturated - allowing for easy collection and disposal with efficient targeted absorption properties
- Oil-only absorbents are available as pads, rolls, socks, pillows and in a range of dedicated Spill Kits to suit all requirements
- Larger spill kits available with refill kits to reduce costs

Chemical

- Always yellow in colour for easy recognition and to alert users that once used the product must be handled in full PPE clothing and disposed of in the approved manner (Yellow for CAUTION!)
- Suitable for more aggressive chemicals such as acids, kerosene and detergents.
- Ideal for use in Laboratories and Chemical plants
- As with all our products, available as pads, rolls, socks, pillows and in a range of dedicated spill kits to suit all requirements.
- Chemical absorbents are also suitable for water-based fluids
- Larger spill kits available with refill kits to reduce costs

In each category you will find several different levels of product ranging from the plain and simple Classic range, our tried and tested budget solution, to Black & White, for performance and endurance combined, to Superior when strength is paramount.

ABSORBENT PADS

ABSORBENT PADS

Superior Absorbents are one of the most established and best regarded products among the Lubetech Family of Absorbents.

Black & White absorbents have been designed to provide excellent absorption rates and to be long lasting, at an affordable price.

TECH FEATURES Maintenance Pad

Black & White Lightweight Pad

- Available in packs of 100 and 200
- Strong and durable entry level product

| Product No. | Dimensions | Absorbency | Qty |
|-------------|-------------|--------------------|------|
| 77-5000 | 50cm x 40cm | 0.8 Litres Per Pad | 100* |

*also available in packs of 200

Superior Heavyweight Pad

- Open edge for rapid absorption.
- Extra thick for maximum absorption.

| Code | Dimensions | Absorbency | Qty |
|---------|-------------|--------------------|-----|
| 75-5000 | 50cm x 40cm | 1.2 Litres Per Pad | 100 |

TECH FEATURES Oil-Only Pad

Black & White Lightweight Pad

- Heavy duty coverstock for increased tear strength.
- Designed for engineers and workplace maintenance.

| Product No. | Dimensions | Absorbency | Qty |
|-------------|-------------|--------------------|------|
| 77-7000 | 50cm x 40cm | 0.8 Litres Per Pad | 100* |

*also available in packs of 200

Superior Heavyweight Pad

- Heavyweight coverstock for the strongest oil pad on the market.
- Floats on water for easy retrieval.

| Code | Dimensions | Absorbency | Qty |
|---------|-------------|--------------------|-----|
| 75-7000 | 50cm x 40cm | 1.2 Litres Per Pad | 100 |

TECH FEATURES Chemical Pad

Black & White Lightweight Pad

- Perforations make these suitable for minor spills.
- Absorbs most chemicals.

| Product No. | Dimensions | Absorbency | Qty |
|-------------|-------------|--------------------|-----|
| 77-6000 | 50cm x 40cm | 0.8 Litres Per Pad | 100 |

*also available in packs of 200

Superior Heavyweight Pad

- Mattressing effect for ultimate capacity.
- Centre perforated for delicate applications.

| Code | Dimensions | Absorbency | Qty |
|---------|-------------|--------------------|-----|
| 75-6000 | 50cm x 40cm | 1.2 Litres Per Pad | 100 |

Not sure what product you need? Call for free advice or click 'find a product' at www.lubetech.co.uk

ABSORBENT ROLLS

ABSORBENT ROLLS

Superior absorbents have been designed to be thicker than normal, greatly increasing absorbency speed and fluid retention. With a roll diameter of over 45cm these are the fastest absorbing materials Lubetech produce, completing cleanup quicker.

The combination of performance and endurance of Black & White Absorbents, has been achieved by using a thicker than usual coverstock combined with a high loft fling.

TECH FEATURES Maintenance Roll

Black & White Lightweight Roll's

- Excellent performance
- Ideal for all general purpose absorbent requirements

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|---------------------|-----|
| 77-5001 | 50cm x 40m | 80 Litres Per Roll | 1 |
| 77-5002 | 90cm x 40m | 144 Litres Per Roll | 1 |

Superior Heavyweight Roll

- Open edge for rapid absorption.
- Black coverstock to camouflage spills and for superior strength.

| Code | Dimensions | Absorbency | Qty |
|---------|------------|---------------------|-----|
| 75-5001 | 50cm x 40m | 120 Litres Per Roll | 1 |

TECH FEATURES Oil-Only Roll

Black & White Lightweight Roll's

- Ideal entry level product
- Excellent performance.

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|---------------------|-----|
| 77-7001 | 50cm x 40m | 80 Litres Per Roll | 1 |
| 77-7002 | 90cm x 40m | 144 Litres Per Roll | 1 |

Superior Heavyweight Roll

- High tensile strength - the strongest in the market.
- The most efficient absorbent for high volume spills.

| Code | Dimensions | Absorbency | Qty |
|---------|------------|---------------------|-----|
| 75-7001 | 50cm x 40m | 120 Litres Per Roll | 1 |

TECH FEATURES Chemical Roll

Black & White Lightweight Roll's

- 'Easy-tear' perforations
- Scuff resistant coverstock

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|---------------------|-----|
| 77-6001 | 50cm x 40m | 80 Litres Per Roll | 1 |
| 77-6002 | 90cm x 40m | 144 Litres Per Roll | 1 |

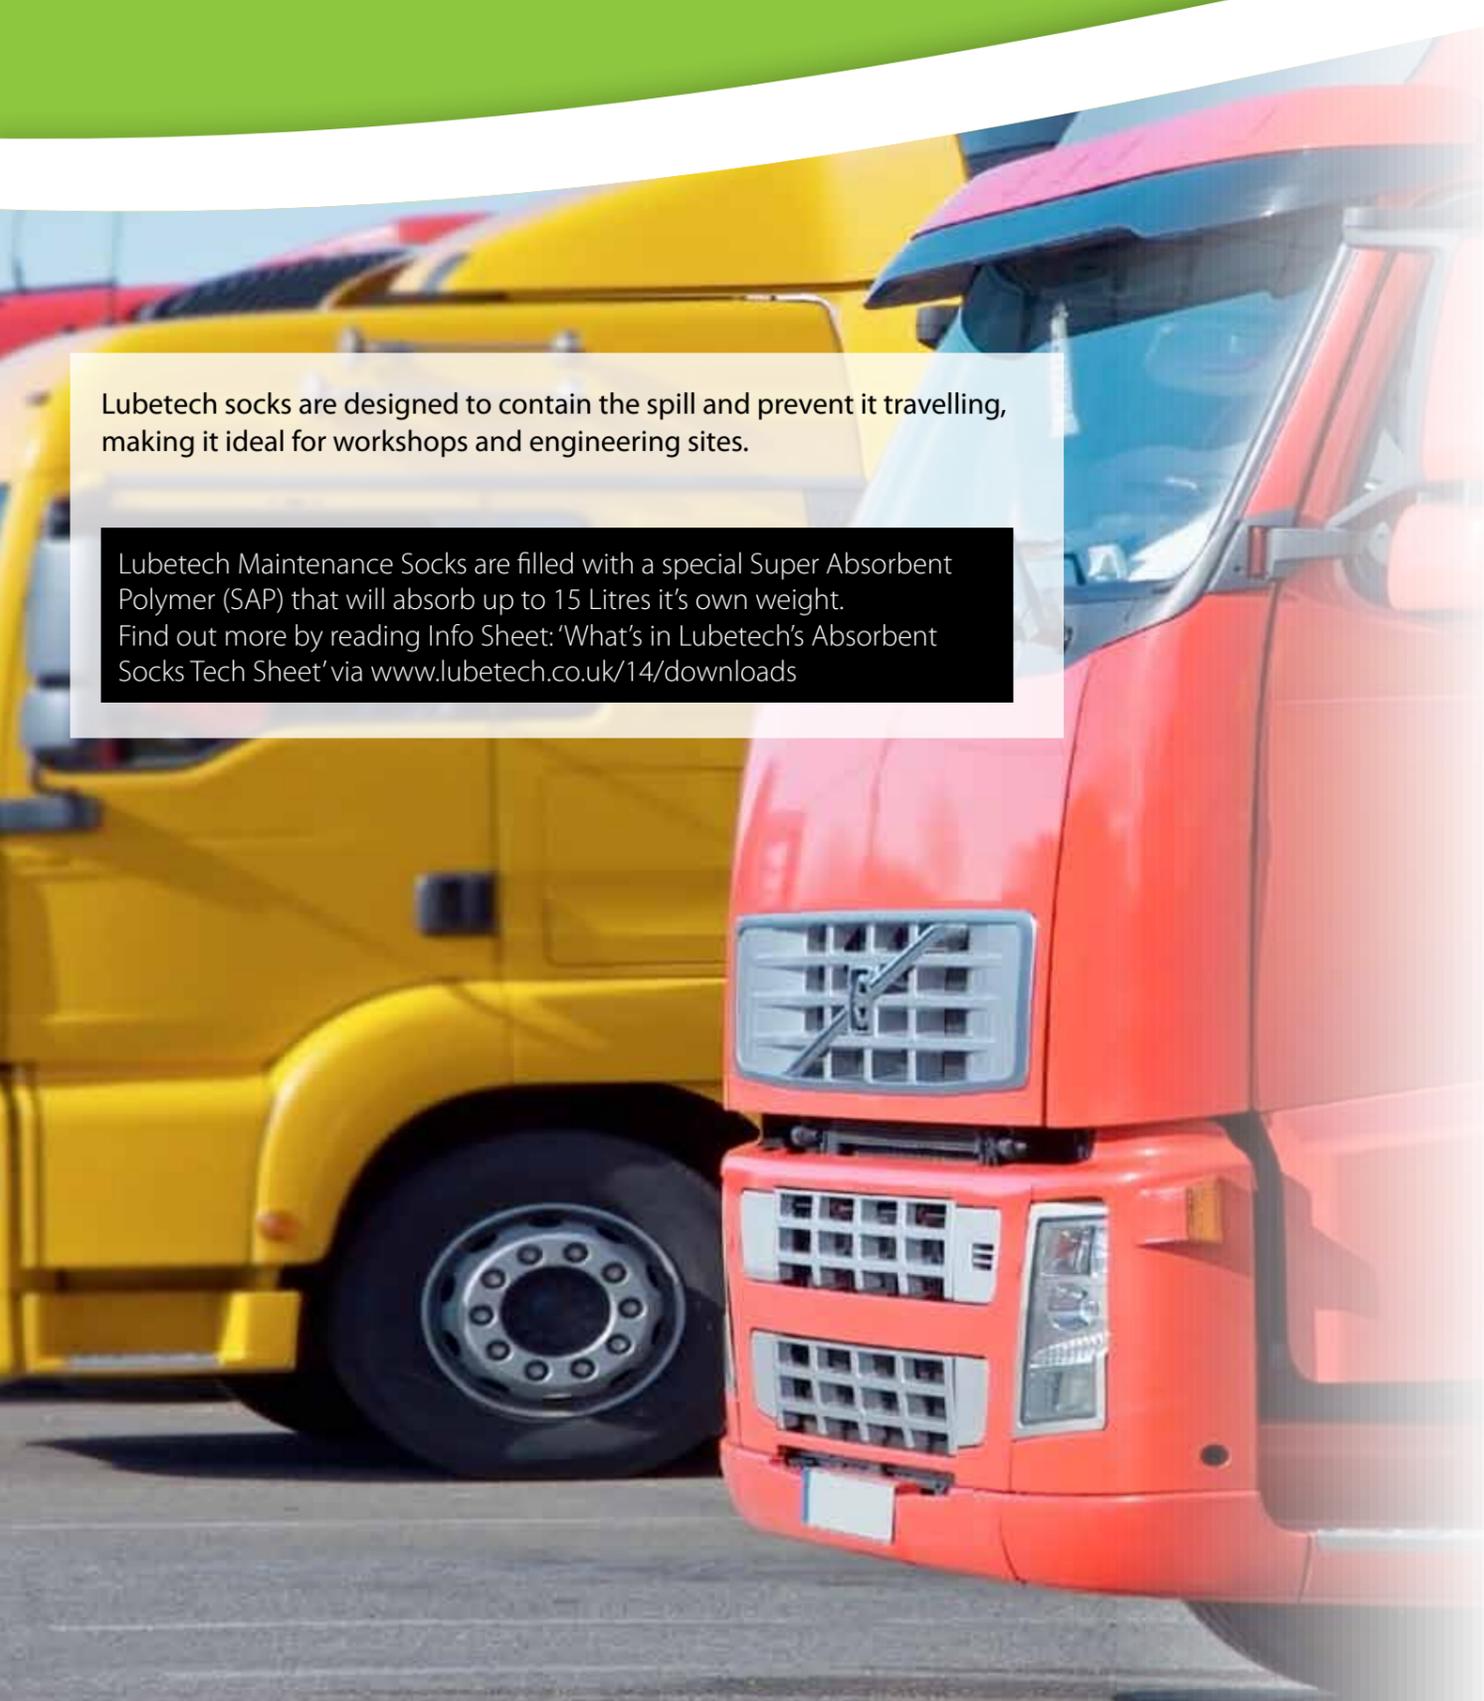

Superior Heavyweight Roll

- Bonded construction for maximum fluid retention.
- Compatible with our Spill Depot storage system.

| Code | Dimensions | Absorbency | Qty |
|---------|------------|---------------------|-----|
| 75-6001 | 50cm x 40m | 120 Litres Per Roll | 1 |

ABSORBENT SOCKS

Lubetech socks are designed to contain the spill and prevent it travelling, making it ideal for workshops and engineering sites.

Lubetech Maintenance Socks are filled with a special Super Absorbent Polymer (SAP) that will absorb up to 15 Litres it's own weight. Find out more by reading Info Sheet: 'What's in Lubetech's Absorbent Socks Tech Sheet' via www.lubetech.co.uk/14/downloads

TECH Maintenance Sock

- Knitted outer skin with performance fill
- Absorbs more than 4 litres
- Fast absorbency speeds

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|-------------------|-----|
| 77-2000 | 6cm x 1.2m | 4 Litres Per Sock | 20 |

TECH Oil-Only Sock

- Sewn spun bond outer for durability
- Hydrophobic - floats on water
- White construction for visible indication of oil

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|-------------------|-----|
| 77-3000 | 6cm x 1.2m | 3 Litres Per Sock | 20 |

TECH Chemical Sock

- Sewn spun bond outer for durability
- Distinct colour for easy recognition
- Absorbs most fluids including aggressive acids & alkalis

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|-------------------|-----|
| 77-1000 | 6cm x 1.2m | 3 Litres Per Sock | 20 |

ABSORBENT PILLOWS

Classic pillows are the volume absorbent of choice, with a spun bond outer skin capable of absorbing large quantities in the tightest of spaces.

Like Lubetech's absorbent socks, our maintenance pillows also contain the SAP material, giving them unparalleled absorbency.

TECH FEATURES Maintenance Pillow

- Spunbond outer skin for durability and retention.
- Absorbs more than 4.5 litres of fluid.
- Used to absorb spill in tight spaces.

| Product No. | Dimensions | Absorbency | Qty |
|-------------|-------------|-----------------------|-----|
| 57-5009 | 38cm x 23cm | 4.5 Litres Per Pillow | 16 |

TECH FEATURES Oil-Only Pillow

- Spunbond hydrophobic skin lets in oil only.
- Flexible so ideal for using where space is limited.
- High absorbent, virgin polypropylene fill.

| Product No. | Dimensions | Absorbency | Qty |
|-------------|-------------|-----------------------|-----|
| 57-7009 | 38cm x 23cm | 3.5 Litres Per Pillow | 16 |

TECH FEATURES Chemical Pillow

- Spunbond outer skin
- Soft and flexible so use when space is limited
- Perfect for soaking up contained spills in hazardous environments

| Product No. | Dimensions | Absorbency | Qty |
|-------------|------------|-----------------------|-----|
| 57-6009 | 38cm x 23m | 3.5 Litres Per Pillow | 16 |

MAINTENANCE SPILL KITS - SUPERIOR

MAINTENANCE SPILL KITS

Everything you need in the work environment to control water, fluid, oils and non-aggressive chemical spills.

From the 25 litre `Superior` clip close carrier and 50 litre `Superior` vinyl holdall you can hang on a door or sling over your shoulder, to the 120 litre wheelie bin for quick response to the seat of the spill, up to the 600 litre drop-front poly bin for site and plant requirements, the Lubetech Maintenance Spill Kit is your `one-stop` package for immediate response: You already know the pads, rolls, socks and pillows. We've put them in a single handy dispenser, right down to disposal bags and ties.

Not only that, Lubetech `stack'n'pack` ergonomics means we stack those kits to cover how you use them in an emergency and we pack them with `Superior` brands for maximum absorbency in the smallest, most compact package.

25 LITRES

Clip Close Carrier

| Code | Contents | Qty |

GRANULES

Lubetech absorbent granules provide effective ingredient for interior & exterior spills. Choose from mineral-based products such as Attapulgitic Clay XR60, through to lightweight XR70 cellulose granules fire-retardant to BS 476 Part 7 Class 1, or the specialist oil-only XR99 range suitable for use on highways. Lightweight and easy-handling, Lubetech cellulose granules are made from sustainable sources only.

Available separately from spill kits, granules represent fast, effective spill response in areas where residual mess is not detrimental to operations. Your first step in spill control.

TECH FEATURES XR60 General Purpose Mineral Granules

- Chemically inert.
- High crush resistance even when saturated.
- Attapulgitic natural mineral.

| Product No. | Bag Size | Absorbency | Qty |
|-------------|-----------|-------------------|-----|
| 11-1114 | 20 Litres | 10 Litres per Bag | 1 |

TECH FEATURES XR70 Natural Cellulose Granules

- Fire retardant to BS476 Part 7 Class 1.
- 100% biodegradable.
- Lightweight for easy handling.

| Product No. | Bag Size | Absorbency | Qty |
|-------------|-----------|-------------------|-----|
| 11-1113 | 30 Litres | 12 Litres per Bag | 1 |

TECH FEATURES XR77 Industrial Spillage Absorbent

- Honeycomb structure for superior retention
- Suitable for all surfaces including smooth internal floors
- Lightweight for easy handling

| Product No. | Bag Size | Absorbency | Qty |
|-------------|-----------|-------------------|-----|
| 11-1177 | 10 Litres | 10 Litres per Bag | 1 |

TECH FEATURES XR99 Highway Grade Granules

- Excellent floor coverage
- Low skid risk during deployment and after clean-up
- Highly absorbent porous mineral

| Product No. | Bag Size | Absorbency | Qty |
|-------------|-----------|-------------------|-----|
| 11-1170 | 20 Litres | 14 Litres Per Bag | 1 |

COMPLIANCE & REGULATIONS

Oil Storage Regulations

Since September 2005 'The Control of Pollution (Oil Storage) Regulations 2001' have applied to all oil and fuel stored at an industrial or commercial site in England and Wales. In Scotland the similar 'The Water Environment (Oil Storage) Regulations 2006' now apply fully since April 2010. Although differing slightly, both sets of regulations have much the same effect on how oils and fuels are stored. The following is a brief overview to help you when selecting drum and IBC storage products.

FAILURE TO COMPLY WITH REGULATORY LEGAL REQUIREMENTS SPELLS DOOM FOR MANY BUSINESSES EVERY YEAR.

BEING PREPARED IS NOT JUST BEING LEGAL, ITS GOOD FOR BUSINESS.

Who needs to comply?

Any industrial, commercial or institutional site storing 200 litres or more of oil or fuel above ground in one or more containers. In England & Wales the regulations only apply to outdoor storage, although the recommended 'Pollution Prevention Guidelines' from the Environment Agency would apply to indoor storage. In Scotland the regulations apply to both outdoor and indoor storage.

What's required?

All containers storing oil or fuel, whether a drum, an IBC or a tank, must be sufficiently bunded within themselves or stood on a spill pallet or drip tray that provides sufficient containment.

Site Surveys

Many situations, where drum and IBC storage products are required, can be met simply by selecting products from the pages of this brochure. However, there are times when this may not be sufficient – for instance, an appraisal of the risks present and how best to meet them across a whole site may be needed. To ensure that the correct answers are given, why not take advantage of a Lubetech on-site survey that results in a written report that not only highlights any

shortcomings there may be in your fluid management systems, but also recommends how best to meet them in accordance with current regulations and best practice. Such surveys are particularly relevant where you might be seeking to gain ISO14001 or similar Environmental Management System accreditation, or where an audit is required as part of an insurance assessment.

Spill Response Training

You've correctly assessed and have put in place all the drum storage and other spill products required to meet your fluid management plan.

But do your key operatives know how to make correct use of what has been provided? Do they know how to competently respond in the event of a spill? If the answer to these questions is not a confident yes – take a look at running one or more Lubetech on-site spill response training courses. There are three levels to choose from, basic, intermediate or advanced –

and whichever one is selected, the training given will be site specific and relevant to all operations that are carried out. One of these courses is an essential if you're intending ISO 14001 accreditation, which requires competency in the use of pollution prevention measures be demonstrated.

To arrange Lubetech Site Survey or to book Lubetech Spill Response Training, please contact your local distributor.

SPILL PALLETS

Lubetech Spill Pallets are for outdoor and indoor use and have a large bunding capacity making them an ideal solution for the safe storage of drums containing oils, fuels and other fluids. Manufactured from 100% recyclable structural grade polyethylene, Lubetech Spill Pallets are hard wearing and have been designed to be fully compliant with Oil Storage Regulations helping you to protect your work environment.

TECH FEATURES 2-Drum Spill Pallet

- Fully bunded storage for 2 x 205 Litre drums.
- Complies with european oil storage regulations in England, Wales & Scotland.
- DIBT Rated
- High load capacity

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|--------------------|------------|---------|--------|
| 31-3022 | 1300 x 750 x 440mm | 250 Litres | 1350 Kg | 20 Kg |

* SAFE WORKING LOAD

TECH FEATURES 4-Drum Spill Pallet

- Fully bunded storage for 4 x 205 Litre Drums.
- Complies with european oil storage regulations in England, Wales & Scotland.
- Compatible with most fork lift and pallet trucks for easy manoeuvring when not in use.
- DIBT Rated

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|---------------------|------------|---------|--------|
| 31-3024 | 1380 x 1290 x 280mm | 250 Litres | 2700 Kg | 30 Kg |

* SAFE WORKING LOAD

INTERNAL BUNDED FLOORING

Lubetech Bunded Floors provide you with a safe and cost effective solution for the safe storage of drums in internal dispensing areas. Lubetech bunded floors are versatile and can be linked together helping you to maximize productivity from the space available. They are manufactured in the UK using 100% recyclable structural grade polyethylene.

1500mm & 7000mm Linking Kit

- Clips over short edge bunded flooring modules to create larger modules.

| Product No. | Dimensions | Product No. | Dimensions |
|-------------|------------------|-------------|-----------------|
| 31-3005 | 1500 x 40 x 40mm | 31-3006 | 700 x 40 x 40mm |

2-Drum Bunded Flooring Module

- Fully modular flooring system.
- Modules can be used individually or linked together.
- Removable platforms with slip resistant texture.
- DIBT Rated

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|--------------------|------------|---------|--------|
| 31-3002 | 1600 x 800 x 150mm | 120 Litres | 1350 Kg | 24 Kg |

Ramp for Bunded Flooring System

- Compatible with both the 2-Drum and 4-Drum modules.
- Locks into module with integrated locking pins.
- Easy gradient for low stress operations.
- Slip resistant texture on slope.

| Product No. | Dimensions | SWL* | Weight |
|-------------|--------------------|--------|--------|
| 31-3004 | 1290 x 810 x 180mm | 300 Kg | 15 Kg |

4-Drum Bunded Flooring Module

- Use as a stand alone unit or linked with other 2- or 4-Drum modules.
- DIBT Rated
- Can be used with the ramp for easy access (product no. 31-3004).

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|---------------------|------------|---------|--------|
| 31-3003 | 1600 x 1600 x 150mm | 240 Litres | 2700 Kg | 45 Kg |

DRUM HANDLING & DISPENSING

Lubetech's range of Drum Handling & Dispensing solutions are renowned for their quality, made from 100% recycled structural grade polyethylene. These products have been created to help make it safer and easier to store, move and dispense industrial fluids. From versatile horizontal dispensing systems to bunded transport and dispensing trolleys, the Lubetech Drum Handling & Dispensing range offers the correct product to suit your operational requirements.

2-Drum Horizontal Store & Dispensing Stacking Unit

- Use in combination with the base unit to provide storage for 4 x 205 litre drums.
- Alternatively position on a 4-Drum spill pallet for a cost effective bunded dispensing system (Illustrated).
- DIBT Rated

| Product No. | Dimensions | SWL* | Weight |
|-------------|--------------------|---------|--------|
| 31-3037 | 1375 x 940 x 390mm | 1350 Kg | 15 Kg |

2-Drum Horizontal Store & Dispensing Unit

- Combines full bunding with dispensing in one unit.
- DIBT Rated
- Use as a stand along unit or with the stacking unit (illustrated).

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|---------------------|------------|---------|--------|
| 31-3036 | 1375 x 1350 x 635mm | 450 Litres | 1350 Kg | 46 Kg |

- Can be used in combination with 31-3024 - 4 Drum Spill Pallet

DRUM HANDLING & DISPENSING

TECH FEATURES Drum Trolley Handling

- Safe transport for drums or a number of smaller items.
- Use for splash free filling of drums.
- Use for transporting and storing a waste collection drum.

| Product No. | Product | Capacity | SWL* | Weight |
|-------------|--|---|------|---------|
| 15-1005 | Heavy Duty Drum Truck (Steel Drum) | Drum trolley for 205/210 litre drums | | 20 Kg |
| 15-1007 | Heavy Duty Drum Truck c/w rear castor (Steel Drum) | Drum trolley for 210 litre drums | | 25 Kg |
| 15-1009 | Drum Handling Platform Drum Trolley | Platform drum trolley for 210 litre drums | | 27.5 Kg |

TECH FEATURES Drum Trolley For 205 Ltr Drum c/w Brakes

- Safe transport for one 205 litre drum or a number of smaller items.
- Use for splash free filling of drums.
- Use for transporting and storing a waste collection drum.

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|-------------------|-----------|--------|---------|
| SP-2252 | 725 x 725 x 990mm | 30 Litres | 250 Kg | 15.5 Kg |

TECH FEATURES Drum Funnel For 205 Drums

- Compatible with standard steel 205 litre drums.
- Use for splash free filling of drums.
- Hinged lid keeps unit closed when not in use to prevent filling with rainwater, etc.

| Product No. | Dimensions | Weight |
|-------------|-------------------|--------|
| 31-1267 | 610mm dia x 230mm | 4 Kg |

TECH FEATURES Tray For 205 Litre Drum

- Circular tray for storing various items up to a 205 litre drum.
- Cost effective & storage solution.

| Product No. | Dimensions | Capacity | Weight |
|-------------|-------------------|-----------|--------|
| 31-1357 | 870mm dia x 190mm | 50 Litres | 5 Kg |

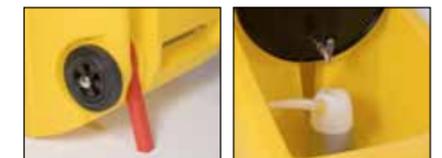

Product No.
31-1267

Product No.
31-1357

TECH FEATURES Bunded Transport & Dispensing Trolley

- Mobile dispensing and sump in one unit.
- Double walled construction for extra security against leaks.
- Can easily be handled by one man with a unique 'Drop Down' support leg (illustrated below) to hold the unit in an upright position whilst securing the drum using the integral ratchet strap.

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|--------------------|------------|--------|--------|
| 31-3060 | 815 x 1740 x 680mm | 250 Litres | 300 Kg | 42 Kg |

OUTDOOR IBC & DRUM STORAGE

Lubetech's Outdoor IBC & Drum Storage products offer quality 'all-weather' protection solutions. These units ensure your stocks are kept dry while offering protection against the fluids stored becoming contaminated by vegetation debris and site dust. Made from 100% recyclable structural grade polyethylene - these systems are designed to endure the rigours of industrial environments.

TECH FEATURES Polyethylene 'All Weather' Spill Pallet

- Lockable and accessible from both sides
- Ribbed roll door for increased strength and security.
- Moulded ground securing points for stability in exposed locations
- Available in 2-drum or 4-drum configurations.

| Product No. | Dimensions | Capacity | Qty |
|-------------|-----------------------------|------------|-----|
| 31-3025 | 2-Drum 1560 x 1100 x 2110mm | 250 Litres | 1 |
| 31-3026 | 4-Drum 1560 x 1100 x 2110mm | 250 Litres | 1 |

TECH FEATURES Double IBC Spill Pallet c/w Frame & Cover

- Fully banded and weather protected storage for 1,000 litre IBC'S
- Designed for high volume external storage
- Can also be used for storing up to 8 205 litre drums

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|----------------------|-------------|---------|--------|
| 31-1344 | 2560 x 1350 x 2210mm | 1140 Litres | 2500 Kg | 156 Kg |

TECH FEATURES Single IBC Spill Pallet c/w Frame & Cover

- Fully banded and weather protected storage for 1,000 litre IBC'S
- Heavy duty vinyl tarpaulin

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|----------------------|-------------|---------|--------|
| 31-1343 | 1760 x 1350 x 2410mm | 1100 Litres | 1500 Kg | 119 Kg |

INDOOR IBC & DRUM STORAGE

TECH FEATURES Single IBC Spill Pallet

- Safe, banded storage for 1 x 1000 litre IBC's.
- Designed to be used with or without dispensing trays (product No. 31-3072) for maximum cost effectiveness.
- Rigid design.
- Also available with load platform (31-3071).

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|----------------------|-------------|---------|--------|
| 31-3070 | 1450 x 1450 x 1000mm | 1100 Litres | 2000 Kg | 75 Kg |

TECH FEATURES Dispensing Tray For Single IBC Spill Pallet

- A versatile dispensing tray which can be moved to provide easy access when loading the IBC bund.
- Overflow feature designed to discharge fluids back into the IBC bund.

| Product No. | Dimensions | Capacity | Weight |
|-------------|--------------------|------------|--------|
| 31-3072 | 640 x 590 x 1065mm | 100 Litres | 13 Kg |

Product No.
31-3070

Product No.
31-3072

TECH FEATURES Double IBC Spill Pallet c/w Load Platform

- Safe, banded storage for 2 x 1000 litre IBC's.
- Can also be used for storing up to 8 x 205 Litre drums or a combination of both.
- Must be used with platforms (supplied with unit).

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|---------------------|-------------|---------|--------|
| 31-3073 | 2450 x 1450 x 575mm | 1100 Litres | 4000 Kg | 120 Kg |

TECH FEATURES Dispenser Tray For Double IBC Spill Pallet

- A versatile dispensing tray which can be moved to provide easy access when loading the IBC bund.
- Overflow feature designed to discharge fluids back into the IBC bund.

| Product No. | Dimensions | Capacity | Weight |
|-------------|-------------------|------------|--------|
| 31-3074 | 640 x 590 x 640mm | 100 Litres | 8 Kg |

TECH FEATURES Single IBC Spill Pallet With Integral Bucket Space

- Lubetech IBC bunds c/w integral bibs provide rigid and safe banded storage and dispensing units for 1 x 1000 litre IBC'S. The integral dispensing area is designed to minimise the risk of drips and leaks when dispensing.
- Also available with load platform (31-3076).

| Product No. | Dimensions | Capacity | SWL* | Weight |
|-------------|---------------------|-------------|---------|--------|
| 31-3075 | 2000 x 1490 x 765mm | 1100 Litres | 2000 Kg | 75 Kg |

SPILL TRAYS

Lubetech's general purpose spill trays provide a versatile modular system for the storage of smaller containers. The Lubetech spill trays are designed to accommodate the requirements of all industry types, features include robust construction and optional platform inserts which include a unique 'non-slip' textured upper surface.

20 LITRES

Spill Tray c/w Platform

SPILL DEPOT

Having identified the need to provide our customers with a safe way to store and dispense Lubetech absorbents in the workplace, we created the Lubetech Spill Depot system.

A Spill Depot provides the easiest and most convenient way to store, issue and monitor absorbent pads, rolls, socks and pillows. Floor-standing or wall mounted, the modular design adapts to your requirements. Emergencies need spill kits: For daily dispensing choose Depot!

TECH Spill Depot FEATURES

- Versatile modular system for floor standing or wall mounting
- Engineered rigid design
- High quality industrial polyester powder coated steel construction

| Product No. | No. Dispenser | No. Lockable Cabinet | Dimensions | Qty |
|-------------|---------------|----------------------|--------------------|-----|
| DEPOT-1 | 1 | 0 | 600 x 450 x 600mm | 1 |
| DEPOT-2 | 2 | 0 | 600 x 450 x 1270mm | 1 |
| DEPOT-4 | 1 | 1 | 600 x 450 x 1270mm | 1 |
| DEPOT-5 | 2 | 1 | 600 x 450 x 1870mm | 1 |

The Oil Safe fluid transfer system is internationally recognised by leading companies as the optimum solution for oil storage and dispensing in workshops. The range includes four different drum sizes, along with colour coded lid options helping prevent cross contamination and misapplication of oils.

Oil Safe Drum

| Product No. | | Weight |
|-------------|---------------|--------|
| 15-1200 | 2 Litre Drum | 0.40Kg |
| 15-1202 | 5 Litre Drum | 0.80Kg |
| 15-1203 | 10 Litre Drum | 0.80Kg |

* AVAIALE IN 1.5, 2, 3, 5, OR 10 LITRE.

Oil Safe Pump

| Product No. | | Weight |
|-------------|--|--------|
| 15-1216 | Designed to be used in conjunction with the utility lids | 1 Kg |

Oil Safe Storage Lid

| Product No. | | Weight |
|----------------|---|--------|
| 15-1204* (Red) | Fits to any 1.5, 2, 3, 5, or 10 litre drums | 0.3 Kg |

* AVAIALE IN 10 DIFFERENT COLOURS

Oil Safe Utility Lid

| Product No. | | Weight |
|----------------|---|--------|
| 15-1207* (Red) | Fits to any 1.5, 2, 3, 5, or 10 litre drums | 0.3 Kg |

* AVAIALE IN 10 DIFFERENT COLOURS

Oil Safe Stumpy Spout Lid

| Product No. | | Weight |
|----------------|---|--------|
| 15-1210* (Red) | Fits to any 1.5, 2, 3, 5, or 10 litre drums | 0.5 Kg |

* AVAIALE IN 10 DIFFERENT COLOURS

Oil Safe Stumpy Hose Extension

| Product No. | | Weight |
|-------------|--------------------------------|---------|
| 15-1217 | For use with stumpy spout lids | 2.25 Kg |

Oil Safe Stretch Spout Lid

| Product No. | | Weight |
|----------------|---|--------|
| 15-1213* (Red) | Fits to any 1.5, 2, 3, 5, or 10 litre drums | 0.5 Kg |

* AVAIALE IN 10 DIFFERENT COLOURS

Oil Safe Stretch Hose Extension

| Product No. | | Weight |
|-------------|---------------------------------|---------|
| 15-1218 | For use with stretch spout lids | 2.25 Kg |

| Product No. | | Weight |
|----------------|---|--------|
| 15-1441* (Red) | Fits to any 1.5, 2, 3, 5, or 10 litre drums | 2.8 Kg |

* AVAIALE IN 10 DIFFERENT COLOURS

BUNDIQUICK

From a bundle to a bud in seconds, BundiQuick is your portable first response fluid containment system

The Pop Up Pool Plus delivers immediate fluid capture capability, while the unique self-inflating bladder system allows containment of the spilt fluid – and for its re-use when the spill danger has passed! Simply disconnect the quick-release valve, decant the contents of the bladder - and away you go!

Compact folded size allows BundiQuick to be conveniently stored in vehicles, while three selectable sizes capture 75-litres, 250-litres or even 565 Litres of spilt fluid, making it suitable for highway, industrial, commercial or workspace use.

TECH FEATURES **BundiQuick**

- Yellow for higher visibility.
- Quick and easy to deploy.
- Folds up for easy storage

| Product No. | Dimensions | Capacity | Qty |
|-------------|-------------------|------------|-----|
| 31-2093 | 100 x 100 x 310mm | 75 Litres | 1 |
| 31-2094 | 160 x 160 x 530mm | 250 Litres | 1 |
| 31-2095 | 200 x 200 x 540mm | 565 Litres | 1 |

TECH FEATURES **BundiQuick Decanting Pump**

- Essential component for the Bundi Quick solution
- Effectively Pumps out the filled bund

| Product No. | Dimensions | Capacity | Qty |
|-------------|-------------------|----------|-----|
| 31-2092 | 620 x 360 x 150mm | N/A | 1 |
